DEFIBRILLATOR (AED)

Thousands of Victorians suffer an out-of-hospital cardiac arrest every year.

A cardiac arrest occurs when the heart suddenly stops. Immediate action is critical. For every minute without lifesaving intervention, a person's chance of surviving decreases rapidly. Tragically, only one in 10 people survive.

When a bystander performs CPR, a person is twice as likely to survive. If an AED (defibrillator) is also used, this survival rate dramatically increases.

An AED is a lightweight, battery-operated, portable device that checks the heart's rhythm and sends a shock to the heart to

restore a normal rhythm. The computer analyses the heart rhythm to find out whether an electric shock is needed. If needed, the electrodes deliver the shock.

The public now have access 24/7 to an AED stationed at Bolwarra Primary School, 249 Princes Highway Bolwarra. The AED is mounted outside the staff/administration office.

UNWELL STAFF/STUDENTS

With restrictions easing across Victoria it's a good time to remind everyone of our responsibilities. The updated *Operations Guide* informs me that 'the most important action school communities can take to reduce the risk of transmission of coronavirus, is to ensure that any unwell staff and students stay at home, even with the mildest of symptoms'.

By following the best medical advice available now I am hopeful that 2021 will see our community continue to flourish.

Thank you to the 7 parents who have completed the survey. We would still like many more responses to this survey
